GoPro is to action cameras what Kleenex is to tissues. That is, the GoPro brand has become so synonymous with compact action cams that even off-brand cameras are referred to, often incorrectly, as GoPros.But theres only one GoPro, and although the California-based company wasnt the first to make a compact camera capable of capturing photos and video in extreme conditions, it was the first to make it mainstream, and to this day its cameras remainsome of the best.What is a GoPro, though? Read on to find out more about the little marvel that birthed a new industry.So, what makes a GoPro?The GoPro camera was originally designed by current CEO Nick Woodman as a compact means to capture photos and videos of him surfing. While the devices are often still used for this purpose, the company has come a long way in the 15 years since its initial inception, and GoPro cameras are now used by all manner of extreme athletes and adventurers, in addition to more casual users.Image used with permission by copyright holderAt its core, a GoPro is a small camera the takes the best qualities of point-and-shoots and camcorders and packs them into a rugged frame thats smaller, waterproof, and virtually indestructible. Inside thecuboid design is an image sensor, processor, ultra wide-angle lens, and up to three microphones for recording audio in different conditions. The users interface is made up of just two or three buttons, and the Hero5 Black and Hero6 Black models feature touchscreens for more control.Imaging capabilitiesAlthough not necessarily the most important component, a defining element of a GoPro is its lens. Rather than using a standard lens, GoPros like many other action cams use an extremely wide lens. What this does is increase the amount of scenery you capture in the frame, making it easy to frame your shot. Mount it to your handlebars or the side of your helmet, and you can rest assured that it sees just about anything that happens in front of you.Image used with permission by copyright holderBut its not only the lens lending credit to the impressive video GoPros capture. GoPros new Hero6 Black captures 4K video at 60 frames per second (fps) and Full HD 1080 at up to 240 fps. This isnt just impressive for such a small camera few interchangeable lens models have achieved 4K/60, with the $2,000 Panasonic Lumix GH5 being the first. As for still photography, the Hero6 shoots 12-megapixel images with features such as WDR (wide-dynamic range, GoPros lingo for high-dynamic range or HDR) and RAW file capture. And a new image processor a first for GoPro cameras helps improve performance and image stabilization. GoPro has managed to put all of this into a camera thats not much larger than most DSLR batteries.GoPros can be used as standalone cameras, but they also pair perfectly with Android and iOS devices, allowing you to add more functionality and versatility. Using built-in Wi-Fi and Bluetooth, users gain full control over their GoPro camera and can even display a live feed of what theyre capturing right on their mobile device.In fact, GoPro has made it really easy for anyone to edit footage and automatically assembles them into a short, shareable videos ready for social media.Endless mounting optionsAnother component of the GoPro that has made it so ubiquitous is its versatility when it comes to mounting. Even the first-generation model was small enough to be mounted in tight, obscure locations. In fact, GoPros mounting system has become so ubiquitous that many other manufacturers make cameras that are compatible with it.Daven Mathies/Digital TrendsFrom standard bike mounts, to suction cup mounts, to aerial mounts for drones, youll be hard pressed to find an object a GoPro cant be attached to by some means or another (a pair of zip-ties will even often get the job done, for a DIY approach). Add waterproofing and the ruggedization of GoPros most recent action cams, and you have yourself a nearly indestructible camera that can be placed anywhere you can imagine. Weve compiled a list of some of our favorite GoPro accessories.LimitationsGoPro cameras are great for hands-free, point-of-view recording but that doesnt mean they can replace a camcorder or larger DSLR or mirrorless camera. For advanced users, a GoPros lack of fully manual control may be problematic (you can set exposure compensation using the Protune feature, but you have no direct control over aperture and shutter speed). The lack of buttons and dials also means youll have to rely on the touchscreen or your smartphone to make changes, which is fine for set-it-and-forget-it adventure filming, but isnt great if you need to make adjustments on the fly.Image quality, while good for a small action camera, is another area where a camcorder or interchangeable lens camera will come out ahead. Mirrorless cameras and DSLRs use significantly larger imaging sensors, which capture more light and thus lead to superior image quality, particularly when you have to shoot in low light conditions. But even small-sensor camcorders benefit from built-in zoom lenses, which offer a variety of perspectives without cropping the image, as a GoPro does when selecting narrower fields of view.Daven Mathies/Digital TrendsHowever, its not GoPros job to compete with such cameras. If youre searching for a sweet and simple solution to capture your adrenaline-fueled adventures, or just a compact means to record your family vacation, its hard to argue against picking one up.For a more in-depth look at what GoPro model is best suited for your needs, check out our in-depth guide. We also have a few tips and tricks to get the most out of the best accessories. US small-cap stock market indexThis article needs additional citations for verification. It was started by the Frank Russell Company in 1984. The index is maintained by FTSE Russell, a subsidiary of the London Stock Exchange Group (LSEG).The Russell 2000 is by far the most common benchmark for mutual funds that identify themselves as "small-cap", while the S&P 500 index is used primarily for large capitalization stocks. It is the most widely quoted measure of the overall performance of small-cap to mid-cap company shares. It is commonly considered an indicator of the U.S. economy due to its focus on small-cap companies in the U.S. market. The index represents approximately 7% of the total market capitalization of the Russell 3000 Index.[1] As of 31December2024[update], the weighted average market capitalization of a company in the index is approximately $3.65billion and the median market capitalization is approximately $0.99billion. The market capitalization of the largest company in the index is approximately $14.72billion.[2] It first traded above the 1,000 level on May 20, 2013, and above the 2,000 level on December 23, 2020.Similar small-cap indices include the S&P 600 from Standard & Poor's,which is less commonly used, along with those from other financial information providers.Example Members of Russell 2000CompanySymbolADTRAN Holdings, Inc.ADTNAlight, Inc.ALITChampionx CorporationCHXChart Industries IncGTLSDenali Therapeutics, Inc.DNLIDorman Products, Inc.DORMEverQuote, Inc.EVERFulton Financial Corp.FULTSpok, Inc.SPOKTilly's, Inc.TLYSWorkivaWKCategoryAll-Time Highs[3]Closing2,442.74Monday, November 8, 2021Intraday2,466.49Monday, November 25, 2024YearPrice returnTotal

In theory, the AirPods Max offer lossless audio when connected via USB-C. In practice, that doesn't always work. The Dell 16 Plus features 16GB of RAM and a 1TB SSD, and it's also a Copilot+ PC. It's on sale from Dell with a $450 discount, for a lowered price of $700. Netflix has now released two mysterious teasers for Knives Out 3, and both might have revealed the release date. I'm getting tired of having to download software for everything under the sun. But will that ever not be a requirement anymore? After wearing the Whoop 5.0 for several weeks, there are some great features Apple needs to look at for the Apple Watch Series 11 and WatchOS 12. The new Blink Video Doorbell can send smart notifications to your device and offers an impressive two-year battery life. We're nearly 5 years into the PS5's lifecycle, which has us reflecting on what we want from Sony's next console. OnePlus has made a memory box feature for phones that saves content and lets you recall it with natural language terms. I tested it and it left me impressed. Did you know that on a clear night, its possible to see the International Space Station (ISS) when it passes overhead? Sunlight reflecting off the habitable satellite causes it to shine brightly as it orbits Earth some 250 miles up, making it easy to spot. For many years now, NASA has operated a service that [] In a surprise move, Apple is reportedly set to shake up how it names its operating systems for the iPhone and other devices. Shortly after SpaceX launched the Starship for the ninth time, NASA astronaut Don Pettit shared some shots of earlier Starship tests that he captured from space. Mountaineer Jesse Armstrong has been talking about how he made his movie, which premieres on HBO this weekend. Out of Sight is one of the best and most underseen movies of the 1990s. Here's why you need to watch it on Amazon Prime Video. Lossless audio can sound better than MP3s and Spotify, but only if you know what you need to get it. The Samsung Galaxy Tab S9 Ultra, which features a 14.6-inch Dynamic AMOLED 2X touchscreen, is on sale from Best Buy for $800 following a $400 discount. For the first time ever, all the tracks in Mario Kart World will exist in one open map. But that doesn't mean old and new courses aren't coming. Here are all the confirmed tracks coming to Mario Kart World. The Sony ULT Wear are good headphones, making it on our list of the best noise-cancelling headphones for their ANC and excellent bass. Now, they're on sale for $50 off. A leaked internal email shares details of the cancellation and the closing of Cliffhanger Games. Now that The Last of Us season 2 has ended, here are five other video game adaptations that fans should watch on film and TV. The Apple Watch Series 10 and the Samsung Galaxy Watch Ultra are both on sale from Amazon right now at 23% off and 39% off, respectively. We've worn the Whoop 5.0 fitness band for several weeks to see if it can take on established winners like the Apple Watch and Oura Ring. Here's our review. The 2025 revival of Asus ROG Strix SCAR 18 goes bolder than ever with its looks and raw firepower. But this machine delivers a few underrated conveniences, too. Elden Ring: Nightreign packs in plenty of thrilling co-op action, but its online matchmaking needs a serious upgrade. AI chatbots are at a stage where they can handle multi-step workflows autonomously with voice, like shopping for purple socks. Is it the end for our keyboards? The next Pokmon title is coming this fall and will release on both Nintendo Switch and Nintendo Switch 2 at the same time. To a T is a charming and well-intentioned game about celebrating our differences that doesn't quite stay on balance. The Panasonic Z95A is our runner-up TV and one of the top 5 TVs of all time, but this deal that keeps getting steeper and steeper may finally make it rank #1. SpaceX launched the world's most powerful rocket for the ninth time on Tuesday. The JBL Xtreme 4 Bluetooth speaker is an IP67 speaker that's beach ready, rain and shine, and even has a shoulder strap. It has an excellent battery life, great sound, and it is down to just $250 at Amazon right now. AMD has recently announced the RX 9060 XT graphics card during Computex 2025. While no one expects it to beat any of the best graphics cards, it can certainly make some waves, and I couldn't be more excited. Except Theres one cloud in this otherwise clear sky, and its a big one. The RX 9060 [] Page 3 SpaceX will launch the mighty Starship rocket for the ninth time on Tuesday. The 13-inch Apple MacBook Air M4 was just released in March, but you can already get a $119 discount on its configuration with 16GB of RAM and a 256GB SSD from Amazon. Need some help using the robotic arm on the Roborock Saros Z70? Here are a few tips and tricks to improve its performance, plus a look at its limitations. The Alienware 18 Area 51 gaming laptop with the Nvidia GeForce RTX 5080 graphics card and 32GB of RAM is on sale from Dell with a $350 discount. There is now an official WhatsApp app specifically for iPads in the App Store. The industry is yearning for Apple to deliver an al smackdown with iOS 19, but what I would love is a return to the past with a modern twist. HBOs Harry Potter TV show has cast the roles of Harry Potter, Hermione Granger, and Ron Weasley. Grand Theft Auto 3 is coming to PlayStation Plus in June, along with a slew of other noteworthy titles. Looking ahead to the iPhone 17's announcement, here are 5 things we think it needs to make it worthy of our money. Exclusive: Apple has acquired a video game studio for the first time ever: RAC7, the two-person studio behind Apple Arcade hit Sneaky Sasquatch. Fantasy Life i: The Girl Who Steals Time is getting a Switch 2 Edition on launch day, but it will cost you a few dollars to upgrade. Big Distraction is a new studio founded by ex-Fortnite developers, and its debut game is a chaotic co-op roguelike called Lort. Nintendo released a full list of games and apps that won't be compatible with Switch 2, which includes Hulu. Dolby Atmos FlexConnect will finally debut on TCL's 2025 QD-Mini LED TVs. If you loved Dragon Quest 3 HD-2D Remake, you'll probably dig Square Enix's very consistent 1 & 2 remakes based on what we've played. I've spent more than a week using the Galaxy S25 Edge; here's what Apple needs to do with the iPhone 17 Air in response. The film tells the story of the making of one of the most important movies in history. I found three free web apps that helped me organize my time and find ways to get work done without rushing it. The Galaxy S25 Edge is just a thin smartphone, right? Yes, but as we found out using it for a while, it's a lot more than that. Here's our in-depth review. Sony's best ANC headphones so far are brilliant in almost every way. After bouncing off an entire genre of games, I never expected my attitude to completely flip when experiencing it again on the Switch. Here are five movies on HBO Max to enjoy on Memorial Day weekend. Three movies are about summer, and two depict war. Windows on Arm laptops have new benchmarks for performance and battery life. But there are scenarios where only an Intel-based machine will rescue you. An ongoing sale from Dell Canada just slashed the prices of a wide range of laptops, desktop computers, and Alienware devices. We're excited to get our hands on the new Switch 2 launch games, but there are a few games on our old consoles we want to play again on more powerful hardware. These Hulu movies are the perfect way to spend your extra time off. One of our picks is one of the greatest war movies ever made. These Prime Video movies are among the best titles to check out this holiday weekend. One of our picks is a Kevin Costner classic. I used to spend lots of money on components and very little on peripherals, but I was wrong. Google's compelling I/O 2025 keynote sparked an internal struggle: do I prefer Google's approach to new products, or Apple's? The Razr 2025 is one of the best flip phones right now, thanks to its affordable price, but there are other phones that you may consider instead. Here are four alternatives to choose! On this episode of You Asked, we dive into the best 98-inch TVs for watching sports, including top picks from TCL, Hisense, Samsung, and Sony plus why spending less might be smarter. We also tackle how long you can realistically expect a TV to last and share tips to avoid eye strain in dark rooms. Finally, get the scoop on Apple CarPlay Ultra and what it means for your next car. A weekly recap of the revolutionary technology powering, connecting, and now driving next-gen electric vehicles. With months to go until launch, Marathon is already being deemed as DOA by the community. The controversies surrounding plagiarism isn't helping, but the core of the issue is much deeper than that. Apple is heavily anticipated to push a design makeover on its OS portfolio and reveal some cool new features, but there are a few that would be amiss. Page 4 TCL's QM7K is a great value that blurs the line between flagship and mid-range. These three action movies are all reminders of what soldiers sacrifice when they go off to war. Find out how to stream them inside. Owen Wilson, Jensen Ackles, and Taron Egerton star in five great TV shows you need to watch in June 2025. Nvidia's RTX 5060 is out now, but before you buy one, consider these 4 other graphics cards instead. The movie is actually less action-packed than many other installments. As the first soundbar with Bluetooth Auracast, it could be a game-changer. The Samsung Galaxy S25 Edge doesn't have a telephoto camera, but I've discovered it may not matter. All the big video game subscription services take a scattershot approach to what games they add, but Crunchyroll's Game Vault uses a different methodology: From grisly realism to far-fetching sci-fi, the experiences of combat troops are for memorable films available to stream on Netflix. Watch these three movies leaving Netflix at the end of May 2025. Our picks include a Martin Scorsese classic and a Batman entry. The movie could be the entry point to the Mission: Impossible The Final Reckoning. We gave the Panasonic W95 an 8 out of 10 when we reviewed it in December. Today it has a huge discount today. The Roborock Saros Z70 is one of the most exciting robot vacuums ever made, but its robotic arm isnt quite ready for the spotlight. In an exclusive interview with Digital Trends, Fear Street: Prom Queen director Matt Palmer talks about his new slasher for Netflix.
