I just bought several new sensors, water, temp, entry, but they are too far away from the base station. According to SS there is no way to extend the base station range. The solution is to move the base station, but then I would be out of range from existing sensors.Can I buy a new base station/keypad, connect the new sensors and monitor the water, temp, etc. with the phone app? I do not want to pay for extra monitoring. Can I add another base station to my current account, or do I have to have separate app access?
