

I'm not a bot

I will be the bad guy then: 1. You call it catchup guide, but it won't make you catchup. It's a guide to help new players, and it surely help somewhat, but it still going to take considerable amount of effort (time) and obviously others not going to wait for you... 2. Time.It sure looks big saying that you can get up to 667 with that... just it misses the estimated overall time to do it.It's not hard to gear up... like kill mobs, get money, buy/encha stuff, repeat. The game is simple...The hard part comes when the players don't want to waste their time on repetitive chore for months/years, as they come for fun, not for a second job.You guys do mention the cost in some places and time estimates, but an overall time would be better prof on catching up (though it would shows the opposite probably).Especially that the gearing process was only illustrated until the easymode ~600gs and well the catchup (or the lack of) only going to come afterwards... 3. Getting PEN kutum as a first PEN, lol... 4. Hard to enhance part on BS is BSTO TET it's easier to enhance a BS than doing PEN on yellow stuff. Sure it's much harder to enhance a BS to PEN, but that ain't a point there.You can do around 2 TET attempts on average from the weekly + the 3 node alone if you not cron. It's expensive, takes time, but if you plan to enhance, then this is the easiest to enhance.Heck you can do the whole questline and enhance from +0. It's actually give decent xp at lvl 59, 60 aswell. 5. Yes, the guide is long. (Which will cause many players to ignore it)However the bigger issue is that it's content ain't properly ordered in importance, there is a lot of filler information there and here, with some shallow mentioning.Like at the start there is a whole page about listing what stats a food give, and about two basically pointless elixirs, which will be only a waste of silver for a new player. If you really think that insignificant bonus the echology gives him is that important, say that he should buy a glass, or better a kama buff for more extra drop rate he ever will see from echology...A picture with a circle of ellie's location in velia and the icon of the food would help more.Mentioning things like knowlodage etc sure can be helpfull... but if he does every litle insignificant thing he will never going to catchup. BDO is all about efficiently. You should ignore the little things if you want to purse highend gear, or play casually but then you will never catchup...Talking about food, instead of pointlessly listing what it gives, say that he should ALWAYS put food on cd. (for health xp), as that's important, and not trivial, due to in other games you only use'em for the buffs. tldr:It's an ok guide for a new player assuming he is willing to read it. But it's not enough tldr like to catch the attention of the avarege player. If someone wish to invest effort into learning how to do things, he will going to read after it. But if he is lazy ass, he won't read a 40+page pdf. Page 2 On: Apr 27, 2021, 16:52 (UTC), Written by PlasticDKI will be the bad guy then: 1. You call it catchup guide, but it won't make you catchup. Page 3 Last Edit : Feb 9, 2024, 00:50 (UTC) # 28 If a new player follow this guide they will progress, but no one should follow this guide if they care about doing so optimally. Also why recommend Dandelion C9 over Godir TRI which gives you a lot more Monster AP which you need to hit the AP caps of high end spots. Not to mention, in your guide you recommend getting to 303 AP WITH 337 DP. WHAT GOOD DOES THAT DO TO YOU? Having 303 AP, being way way way way over cap at Orcs with so low DP that Orz can kill you and with so low DP that you can use that AP on places that need it. Like your ACTUAL ADVICE to someone with 295 AP and 333 DP is to spend 45 billion on getting a bit more AP. You should really never EVER give BDO advice. The formula for calculating Gear Score (GS): GS = ((com. Attack + awa. Attack) / 2) + Defence rounded up. 2018 - 2023, DeSync.rul will show you guys how to calculate your Gear Score (GS) in todays guide. Firstly before we can calculate gear score, well need to find your characters stats. Press Start and click on the Character tab to view your characters stats, or simply press P. Once you pull up your stats, you want to go down and search for battle stats. Click on it to view the details. After that, you want to look for the defensive power and your attacking power or awakening attack power in your battle stats.So I am an Awakening Guardian, so my attack power will be based on my Awakening AP, which is my Awakening weapon. It would be the regular Attack (AP) if you are not awakening. So to calculate your Gear Score, you would want to take your AP for the weapon you currently use + Defense (DP). For instance, I use my awakening weapon(the jordan), so I would want to take Awakening AP 289 + Defense (DP) of 333.My DP is currently 333; my awakening AP is 289; if I take 289 and add it to 333, that would give me 622.So this means that my total gear score is 622. Again, you will want to take your AP plus your DP and add those two together, and you will be able to get your actual gear score. Thats the formula there. If you play Succession, you would take the Attack (AP) + Defense (DP) instead; then in my case it would be 286 + 333, which is 619. You cant perform that action at this time. In Black Desert Online, gear development is critical. Attack points and defense attacks take priority over character categories. You can annihilate opponents in your way with the right armor, weaponry, and upgrades. Youll have a difficult time moving through the game if you dont have the proper gear. Your initial priority should be to obtain a rosar, yuria, and elsh axe, as youll be utilizing one until you are able to obtain and begin improving boss gear. The set benefits are the reason why the armor is built up the way it is. Basically, you have two options: complete grind or complete heve. Everything is quite self-explanatory. Full asula is the main aim for accessories. However, for your offhand, youll want to obtain an oros as early as possible for hammering. Everything will be the same as it was in the previous build in this scenario. At this time, the only item you have to concentrate on is getting all of the armor and weaponry to at least pair. You can always use the supreme weapon reformation stone and the ultimate armor reformation stone to transform the gear to orange quality for the additional sheet stats. You wouldnt have to, but enhancing the armor and weapons from yellow to orange will ensure you get the increased on-sheet statistics without risking your black stones. Also Read: How To Get The Final Form In Black Desert Online A gear score is a number based on a persons gear data. It is said to be a players highest performance capability. In Black Desert Online, the gear score is determined by your strike power, summoned attack performance, and protection power. When you hit 1, youll see the values underneath the gear. You can grind in much more tough locations if your gear score is greater. For example, you can meet the basic attack points needed. However, with higher gear scores, you could grind in that region more easily. Yet, it is up to each person to deliver that level of performance. You can view the benefits you earn for the attack points and defense points brackets you presently have after computing your Black Desert Online gear score. You may also scroll through all of the possible brackets to see what bonuses you can get in the next round. You can use an android app in the MMORPG Black Desert Online to calculate your gear score. Armour or weapons and equipment can all have a level of improvement that boosts their statsfor example, increasing defense factors and a variety of other metrics. +20 (finest/maximum level) PEN (Mv)TET (V) +16 TET (VIII) +19 TET (Abs) +19+17 TRI (III)+14 DUO (I)+13 PRI (V) The rarity of gear in BDO is rated and shaded. The gear rating shows how helpful and efficient an armor, weapon, and accessory is in comparison to similar gear. Blue Grade the highest level of quality Grade: GreenGrade: YellowGrade 1: UnskilledDont make contact with White Grade! Tip: Improved armor, weapons, and equipment have no character stage limits. Even just a phase 1 character can dress up like a PEN (V) ruler. The main advantage of armor is that it gives defense points. This may be a combination of diversion and damage discount. This means youll be able to avoid monster strikes more often and suffer less damage as a result. Also Read: How To Duel Another Player In Black Desert Online? Set bonuses and receive a buff by wearing two or more of the same type of material.Customize your equipment and add extra stats using Crystal Slots.Outcomes of merchandise are a bonus for wearing that piece of armor. Weight restrictions, for example, will rise, as will health factors, and so on. You must employ beginner Naru Gear until you have amassed sufficient cash to begin working on more advanced gear. Following Naru Gear, Tuvalu Gear is also an excellent next step. Unfortunately, season characters are now the only ones who can do so. Tuvalu Gear Details may arrive soon. For the time being, it is oblivious to this knowledge. Naru Gear can be earned through completing Serendias main questline. To see the progression and see your mission rewards, use the O symbol and afterward the major tab. Theres also a chance that Naru Gear would be released sooner. Naru Gear is occasionally dropped by monsters in the beginner zones of Balenos, as well as Serendia and Mediah. Home All Calculators Gaming and Entertainment BDO Gear Calculator In the vast and intricate world of Black Desert Online (BDO), gearing up your character effectively can be a daunting task. This is where the BDO Gear Calculator comes into play, a valuable tool designed to help players measure the overall effectiveness of their characters gear setup. It simplifies the process by calculating a comprehensive gear score that reflects the quality and synergy of the equipped items. The BDO Gear Calculator is a digital assistant that aids players in assessing their gears combined statistical contributions. It uses several inputs, including Attack Points (AP), Defense Points (DP), Accuracy, Evasion, and Critical Hit Rate, which are integral attributes derived from the characters equipped gear. The calculator processes these inputs to provide a Total Gear Score. This score helps players understand their current setups effectiveness and informs decisions on potential upgrades or changes. Inputs Required: AP (Attack Points): Total attack power from gear. DP (Defense Points): Total defense ability from gear. Accuracy: Determines the likelihood of hitting a target. Evasion: Reflects the ability to dodge attacks. Critical Hit Rate: Probability of landing critical hits resulting in extra damage. Formula for Calculating Total Gear Score: Basic Calculation: Total Gear Score = AP + DP Comprehensive Calculation: Total Gear Score = AP + DP + (0.5 Accuracy) + (0.3 Evasion) + (0.2 Critical Hit Rate) Lets calculate the gear score for a character using both the simplified and the comprehensive formula: Example Scenario: AP: 150 DP: 120 Accuracy: 200 Evasion: 100 Critical Hit Rate: 20% Using the Simplified Formula: Total Gear Score = AP + DP = 150 + 120 = 270 Using the Comprehensive Formula: Total Gear Score = 150 + 120 + (0.5 200) + (0.3 100) + (0.2 20) = 150 + 120 + 100 + 30 + 4 = 404 The comprehensive formula provides a more nuanced score by considering additional attributes such as Accuracy, Evasion, and Critical Hit Rate, offering a deeper insight into the gears effectiveness. AttributeValueCalculationContributionAP (Attack)150Base Value150DP (Defense)120Base Value120Accuracy2000.5 Accuracy100Evasion1000.3 Evasion30Critical Hit20%0.2 Critical Hit4Total Score404 The BDO Gear Calculator is more than just a tool; its a strategic asset for Black Desert Online players. By quantifying the effectiveness of gear, it enables players to make informed decisions about which items to equip, optimize, or replace. This, in turn, can lead to a more successful and enjoyable gaming experience. Whether youre a casual player looking to enhance your characters performance or a competitive gamer striving for optimization, the BDO Gear Calculator is an indispensable tool in your arsenal.
