One important aspect of garage security is regularly changing the access code for your garage door opener. Liftmaster, a leading manufacturer of garage door openers, makes it easy to change the code on your unit. Here's a step-by-step guide to help you do it: Materials Needed Liftmaster garage door opener Programming button on the opener unit New access code (4-digit or 6-digit) Step-by-Step Instructions Locate the Programming Button: On most Liftmaster garage door openers, the programming button is located on the unit itself. Look for a small button with the word "Program" or a padlock symbol. Press and hold the programming button for 5 seconds. The LED light on the opener will start blinking. Enter the Current Code: If you have previously programmed a code on your opener, you need to enter it before you can change it. Use the keypad on the opener unit to enter the existing 4-digit or 6-digit code. Enter the New Code: Once you have entered the current code, the LED light will flash again. Within 30 seconds, enter the new 4-digit or 6-digit access code you want to use. Press the Programming Button Again: After entering the new code, press the programming button again to save the changes. Test the New Code: Use the keypad on the opener unit to enter the new access code and see if the door opens. If the door opens, the new code has been successfully programmed. Additional Tips Choose a memorable but secure access code that is not easy to guess. Change your code periodically, especially if you have lost your remote control or keypad. Consider using a rolling code system for added security. Refer to your Liftmaster garage door opener manual for specific instructions and troubleshooting tips. Changing the code on your Liftmaster garage door opener is a simple and important security measure to help protect your home and belongings. By following these steps, you can easily update your access code and ensure the continued security of your garage. How To Change Your Keypad Pin Code On A Liftmaster Garage Door How To Change Liftmaster Garage Code A Step By Guide How To Change Liftmaster Chamberlain Outside Keypad Code Youtube How To Reset A Liftmaster Garage Door Opener Quickly How To Change Liftmaster Keypad Code Garage Door Doctor Tutorial Tiktok How To Program And Reset A Liftmaster Garage Door Keypad Step By Guide How To Reset Liftmaster Garage Door Keypad Step By Instructions Programming Liftmaster 877max Wireless Keypad How To Change The Code On Your Garage Door Keypad For A Liftmaster Side Mount In Dallas Ft Worth Tx How To Reset Your Garage Door Keypad Pin Number Download Article Changing a Chamberlain, Craftsman, LiftMaster, or Genie Keypad Code Download Article Resetting your garage door keypad code is an easy task that only takes a couple of minutes to complete. You don't even need to know your previous keypad code—all you need is a ladder and a screwdriver if your garage motor requires one. Most garage openers use the same method to reset the code, but some keypads have different buttons that might require a different approach. We've covered all of that, plus how to set a temporary code and reset your garage remotes. Keep reading to learn more. Open the light panel on the motor attached to the ceiling of your garage. You may have to remove 2 screws from the top or side of the light cover to release it. Press the square "Learn" button under the light panel. The light above the button or the keypad will turn on. You'll have 30 seconds to enter a new 4-digit code on the keypad. Press the "Enter" button, and the motor light will blink or click once to confirm the code change. 1 Open the light panel on the garage door motor. Most light panels can be removed by gently pulling on the top or pulling the two tabs on the top or bottom that connect the cover to the motor. On some models, you may have to remove 2 screws from the top or sides of the cover to remove it.[1] This method might work for all garage door opener keypads, including Craftsman openers. 2 Press the "Learn" button under the light panel. Once you press the button, the LED light just above it, or the light in the keypad will turn on. This light indicates that you have 30 seconds to enter a new code.[2] The "Learn" button on the back of your motor might be a red/orange, green, or purple square or a yellow or black circle.[3] Advertisement 3 Enter a new code on the keypad within 30 seconds and press "Enter." Most garage door keypads require you to enter a 4-digit code. Once you press "Enter," the light on the motor will flash once or click twice to confirm the new code change.[4] Advertisement 1 Open the light panel on the motor and find the "Learn" button. Uncrew or unclip the light cover from the motor attached to your garage ceiling. Find the square or circle "Learn" button underneath—the color of the button tells you how many times to press it when resetting the code[5] 1 Time: Yellow "Learn" button. 2 Times: Purple "Learn" button. 3 Times: Red/orange "Learn" button. 4 Times: Green "Learn" button. 2 Press the pound (#) and star (*) keys until the keypad light turns off. Once you press both keys, the keypad light will flash rapidly. Hold the buttons until the keypad lights stop blinking and turn off.[6] 3 Enter a new 4-digit code and press the pound (#) key. You'll enter this same code again later to sync your keypad with your garage door motor.[7] 4 Press the "Enter" key the number of times according to the "Learn" button color. This is the number you found in the first step when you found the "Learn" key on your garage door opener motor.[8] 1: Yellow "Learn" button. 2: Purple "Learn" button. 3: Red/orange "Learn" button. 4: Green "Learn" button. 5 Press the "0" key, then press the "Learn" button on the motor. After you press and release the "Learn" button, the LED above it will light up. This signals the start of a 30-second timer for you to enter your new code.[9] 6 Enter your new code within 30 seconds and press "Enter." Once you press "Enter," the garage door opener motor lights will flash or you'll hear 2 clicks that confirm your new code. To test your new code, enter your code and press "Enter." Your garage door should activate.[10] If the keypad doesn't open the door or light up, the battery might be dead. Uncrew or slide the bottom plastic panel down and replace the battery with a new 9 or 12-volt battery.[11] Advertisement 1 Find your unit code information under the light cover on your motor. Take note of the keypad manufacturer. Uncrew or unclip the light cover on your LiftMaster motor and look at the color of the "Learn" button and the manufacturing date. The manufacturer of the keypad, the date, and/or the color of the button indicates what unit code number to enter later.[12] 2: Chamberlain, Sears Craftsman, LiftMaster, Master Mechanic, and Do It Openers manufactured from 1997 to 2004 (Orange/Red "Learn" button). 3: Chamberlain, Sears Craftsman, LiftMaster, Master Mechanic, and Do It Openers manufactured from 2005 to present (Purple "Learn" button). 4: Chamberlain, Sears Craftsman, LiftMaster, Master Mechanic, and Do It Openers manufactured from 1993 to 1996 (Green "Learn" button). 5: Genie Intellcode and Overhead Door openers manufactured from 2005 to present. 6: Genie Intellcode and Overhead Door openers manufactured from 1995 to present. 7: Stanley Garage door openers manufactured from 2003 to present. 8: Chamberlain, Sears Craftsman, and LiftMaster openers manufactured from 2011 to present (Yellow "Learn" button). 9: Wayne Dalton openers manufactured from 1998 to present. 10: Xtreme Garage openers manufactured from 2016 to present. 11: Somer openers manufactured from 2013 to present. 12: Triathlon openers manufactured from 2016 to present. 13: Press the pound (#) and star (*) keys until the keypad light turns off. Once you press both keys, the light will flash—keep holding them down until the light goes off.[13] This confirms that your current code is erased from the keypad's memory. 3 Enter your new code and the unit code, pressing the pound (#) key after each. Within the 10-second time limit, enter your new 4-digit code and press pound (#). Then enter the unit code number you found in the first step and press pound (#).[14] If the keypad light turns off before you enter both codes, repeat the previous step and try again.[15] 4 Press the "Learn" button, enter your new code, and press the "0" key. Go to the motor and quickly press and release the "Learn" button. Go back down to the keypad and enter your new 4-digit code again, then press and release the "0" key. Test out your new code by entering it and pressing the "0" key until the door activates.[16] If you have a Genie or Overhead Door garage door motor, press the "0" key twice.[17] If this doesn't work, uncrew the small rectangular plate on the bottom of the keypad. Flip the switch inside to "program." Advertisement 1 Open the new 4-digit code, then flip the switch back to "operate." Advertisement 1 Open the light cover on the garage door motor. Some models allow you to unclip the light cover around the top or the sides of the motor. On others, you may have to uncrew the 2 screws at the top of the motor to release the cover.[18] You may need to uncrew the lightbulb inside the light cover to see the LED light above the "Learn" button more clearly.[19] 2 Press the "PROG," "6," and "down-up" arrow keys at the same time. Use 3 fingers to press each button at the same time, until the flashing LED near the top of the keypad turns off. This will reset the code on your garage door keypad.[20] "PROG" stands for "program." [21] 3 Press "3," "5," "7," and "PROG" in order and enter a new 4-digit code. The LED light near the top of the keypad will flash slowly for 30 seconds, then flash rapidly for 30 seconds. After you press "PROG," "3," "5," and "7," the LED light will blink 3 times and then stop. [22] 4 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [23] 5 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [24] 6 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [25] 7 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [26] 8 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [27] 9 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [28] 10 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [29] 11 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [30] 12 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [31] 13 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [32] 14 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [33] 15 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [34] 16 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [35] 17 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [36] 18 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [37] 19 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [38] 20 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [39] 21 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [40] 22 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [41] 23 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [42] 24 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [43] 25 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [44] 26 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [45] 27 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [46] 28 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [47] 29 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [48] 30 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [49] 31 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [50] 32 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [51] 33 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [52] 34 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [53] 35 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [54] 36 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [55] 37 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [56] 38 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [57] 39 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [58] 40 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [59] 41 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [60] 42 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [61] 43 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [62] 44 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [63] 45 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [64] 46 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [65] 47 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [66] 48 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [67] 49 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [68] 50 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [69] 51 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [70] 52 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [71] 53 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [72] 54 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [73] 55 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [74] 56 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [75] 57 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [76] 58 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [77] 59 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [78] 60 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [79] 61 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [80] 62 Press "PROG" in order and enter a new 4-digit code. The LED light will blink 3 times and then stop. [81] 63 Press "PROG" in order and enter a new 4-digit code.
