

I'm human

Welcome to our Summoners War tier list featuring all natural 5-star monsters currently available in-game! This list is packed with over 1,000 unique monsters, each boasting special abilities that can be combined to create unbeatable teams. With a vast array of PvE content, competitive PvP battles, and a rich fantasy world filled with quests and challenges, Summoners War offers endless entertainment for gacha game fans. Our tier list compiles player insights from around the globe, providing a comprehensive guide to help you make informed decisions about your team. We've got top monsters like Second Awakened Shannon, Belladeon, Naomi, Spectra, Crow, and Veromos - each with their own strengths and abilities that can be utilized in various game modes. Shannon is a powerful supporter who provides attack and defense buffs to her team, as well as a slow debuff to enemies. She's essential for early-game stability but not a top priority for six-starring immediately. Belladeon, on the other hand, is a versatile healer and debuffer that shines in PvE content with its unique utility. Naomi is a damage-dealing monster that excels at auto-crits against debuffed enemies, while Spectra's crowd-control hybrid skills make him invaluable in Trials of Ascension and Abyss Dungeons. Crow scales his damage with the number of debuffs on the enemy, making him a reliable choice for various content types. Lastly, Veromos is a fusion monster that prioritizes, boasting an AoE damage skill that stuns enemies and cleanses one debuff from allies at the start of each turn. These top nine monsters are must-haves for any Summoners War team, providing a solid foundation for progress in the game. Whether you're new to Summoners War or a seasoned player, this tier list is designed to help you make informed decisions about which monsters to prioritize and how to create unbeatable teams. Verdehile is a key boss monster for Dragon awakening and second awakening dungeons, providing a 40% increase to his team's attack bar with every critical hit. He is highly sought after as part of the "Summoners War Holy Trinity" and offers unmatched utility in PvE content with his passive abilities. Fran is another crucial monster that provides healing, immunity, and attack buffs, making her an ideal addition to any team. She can be obtained through the Summoner's Way quest line and is a must-have for six-starring early on.
