Disney+ app on Google Play Store (Image credit: Joe Maring / Android Central) There are several reasons why you might stop apps from updating automatically on the Play Store. Perhaps the new update has broken functionality, or you need to monitor your data usage and don't want to waste your mobile data. Whatever the reason, here's how you can stop automatic updates on your Android phone. Open Google Play Store on your Android phone. Tap the hamburger menu icon in the upper left corner. Source: Android Central. Scroll down and tap Settings. Scroll down and click Update apps automatically. Select Don't update apps automatically. Click Done. Source: Android Central After this time, your apps will no longer be automatically updated without your participation. However, we recommend that you review your app list from time to time and manually update the apps you use regularly. This is because developers release updates to fix bugs and add more features. Open Google Play Store on your Android phone. Tap the search box at the top of the Play Store. Enter the name of the application you are looking for and click search. Source: Android Central (Source: Source: Android Central). Click an app to open the list. Click the three-dot menu in the upper right corner. Check the box next to 'Turn on automatic updates'. Source: Android Central (Source: Source: Android Central) After doing this, this application will no longer be automatically updated no matter what general settings have been changed. This is great for fine-grained control over which apps get regular updates and which should stay as they are.
