Following the PS4 7.00 OFW update, developer Lanc of Lanc-Remastered.com updated his open source PS4 IP grabber / resolver, puller and sniffer LANC Remastered tool for Windows alongside an application usage tutorial on IH - MIXRGU's YouTube Channel. Similar to popular network traffic packet sniffer Wireshark, the network monitoring and packet analysis application Lanc Remastered is designed primarily for PS4, PS3, Xbox and Xbox 360 gamers to combat / report problem users.**Download:** LancV2AllFiles.zip (25.0 MB) / Lancv2 (lanc-remastered.com).rar (24.72 MB) / LANC Remastered (lanc-remastered.com).zip (988.26 KB) / Lanc GIT / Lanc Remastered GIT / Sourceforge Repo / PSN ResolverFrom the README.md: Features Compatibility Lanc remastered works on any gaming console but focuses on PlayStation and Xbox.Wired and Wireless Operational on a wired (ethernet) and wireless (wifi) connection.Geo Location Tracks the geographical location, country and ISP of all connections.Customizable Able to edit source, destination IP and specify specific port numbers.Requirements Install the following freeware in order for Lanc Remastered to work:Microsoft C++Microsoft SilverlightWinPcapTutorial Check out our how to guide.Issues / Lanc Remastered not working?Any problem related queries should go into our forum section or you can follow our repair section here.**How To Get IPs On PS4 After 7.00 Update** Below are also some PlayStation 4 LAN Game Guides for those interested: And from the latest README.md by lancremastered: PSN-Resolver PSN Resolver The Best IP Finder and IP Puller for PS4 PSN Resolver are IP resolvers that convert PSN usernames to IP addresses and vice versa. The technology works the same as DNS, where as your browser is automatically translating an IP to its correlating domain name. Now in order for a PSN resolver to work, there need to be a central server or database with the whole PSN network to be accessible, however due to security concerns, Sony wont give public access to such information and thereby makes it impractical to resolve all gamer-tags/PSN usernames. By stating the above, you have probably come across websites that claim to resolve PSN usernames, Skype or even Discord. But by the time you spent 5 to 10 minutes testing numerous usernames, you will notice that none of them resolved to any IP address. Thats because the web developer created their own database (not accessing Sonys data) and require users (such as yourself) to build that database from scratch with gamer-tags, IP addresses etc. and ultimately rendering it a complete waste of time. Now that we cleared up a few topics about a PSN resolver. Lets dive into how we can get real IP addresses from PlayStation whilst playing or connected to an in-game party chat in real time.**Requirements**IP Puller / IP finder appComputer running Windows with internet accessWinarWinPcapStep 1 Download & Install Lanc Remastered IP puller with its per-requisites from our website.Step 2 Follow our helpful tutorial to set up Lanc Remastered.Step 3 Grab yourself an IP booter here or follow our guide on how to boot people offline.PSN Resolver Conclusion If you are stuck getting IP addresses or unable to set up lanc remastered. You can check out our repair guide or post it within our forum sections. Alternatively you can use PSN-resolver.com to find tutorials, fixes and PS4 tricks to unlock your consoles full potential. You can perform that action at this time. You cant perform that action at this time. Network Optimization January 26, 2021 Using network monitoring tools we are able to sniff and pull IP addresses from every connection on your device. Today we will recommend and learn more about the best IP puller for PS4 to locate, track and know more about a PSN players details. To understand how a packet sniffer works, you need to first understand that data travels through a network in the form of packets. In packet-switched networks, the data to be transmitted is broken down into several packets. These packets are reassembled once all the data packets reach their intended destination.**When a packet sniffer is installed in the network, the sniffer intercepts the network traffic and captures the raw data packets.** Subsequently, the captured data packet is analyzed by the packet sniffing software and presented to the operator in a user-friendly format.**PS4 IP Puller (TOP 5)**1. Lanc Remastered / PCPSDownload Lanc Remastered or the latest version LANC PCPS IP Puller2. PSN ResolverDownload PSN Resolver and Xbox Resolver. This has changed to Xresolver.3. OctosniffDownload Octosniff4. CommviewDownload Commview5. Console SnifferDownload ConsoleSnifferConclusionThe best ps4 IP puller goes to Lanc Remastered hands down, due to its ease of use and effectively pulling IPs without any hassles.**You can view our tutorial here on how to pull and trace with lanc remastered.**Now that you know how to pull IP addresses its time to use one of our IP booters to boot people offline. The ultimate guide on how to kick and boot people offline on PS4 and Xbox. A few players or even observers would despise such acts, but we as Gamers, are obsessed on winning, upgrading our weapons, gear, unlocking mesmerizing character cosmetics and skins. Sometimes we will do everything in our power for us to achieve our goal, thus even being unethical wont even cross our minds.**While a lot of people will be opposed to these sort of actions, we have created the ultimate gamers guide on kicking and booting people offline to use for your advantage and/or protect your self from such attacks.**First off, lets dive a bit deeper on how we can achieve such an act and answer a few of your questions.**Kick Players and Boot People Offline on PS4/Xbox1.** Obtain the IP Address of the gamer/player**Think of your IP address, like your home address.** Its unique and you know who lives there. With an IP address the same principles apply, your ISP distributing a public IP address to your router and thus your router assigns local IP addresses to your devices within your home (PC, PS4, Mobile device, XBOX etc).**Because we play games online, every bodies public IP addresses needs to connect to that hosting server (Fortnite server, GTA server etc)** Upon connecting on the server we can intercept, scan and retrieve packets which will resolve into IP addresses from fellow players/gamers.**Q:** How can we obtain IP addresses on PS4 and Xbox?**A:** Using software called Lanc Remastered. Its an open source (free) IP puller, sniffer and grabber for PS4 and Xbox. Download it or view our tutorial on how to pull IPs.**2.** Sign up for a Booter service**A Booter is essentially a DOS attack.** And a Denial of service is typically accomplished by flooding the targeted machine or resource with superfluous requests in an attempt to overload systems and prevent some or all legitimate requests from being fulfilled**Using our home/house analogy again.** Think of a Booter service as having 100 people in a 1 room apartment/flat. With that amount of people you will basically be forced to leave or be pushed around. Either way, both seems to be unpleasant and your router feels the same. The Booter service will send so many packets that it will be forced to reboot or with hold sending any packets throughout your home network. (think of brain freeze)**Q:** What Booter should I use?**A:** From our experience we have found Stresslhem to be the most reliable and they come with a bitcoin payment system for bonus security. We also have our own compiled list of free Booters and tools you can use. Read more about it here.**3.** Start kicking and booting people off**Its time to win and cause chaos!** You have the gamers IP address and selected a Booter. Insert the IP address and start launching your attack. Wait 10 seconds and you will be victorious!**Q:** Im using Stresslhem, what information should I type in?**A:** At their Booter panel, you can fill in the IP address, port, duration of attack and which method you want to use. See below screenshot on our config.**How to block booter attacks on PS4/Xbox and Protect myself**As you can see from the above steps on how we boot people offline, the most important information an attacker needed, was your IP address. Blocking such attacks, we only need to fool the gamer/players that want to boot you offline. In doing so, they will boot a wrong IP address and your network wont be saturated.**Our recommendation is to connect your PS4 or Xbox to a VPN before you play online.** Get our limited 35% discount from Express VPN below and make sure you will never be booted offline again!**Select your Console and view tutorial on VPN setup.**VPN for PlaystationVPN for XboxHave you ever fell victim to such attacks? If so, what did you do? Or were you the one sending the attacks? Let us know in the comment section on how your experiences has been online and how do you feel about it. ip grabberip locatorip pullerip snifferip tracker
