No new notifications You'll get updated when important things are happening, and when you engage with our community. Procrastination is a terrible habit, isn't it? Many of us know what it feels like to spend all night cramming for a test, and that only because of choosing to waste a perfectly fine weekend. On über-important things like reaching level 500 on Candy Crush Saga or ensuring that Instagram knows what you're eating. Too bad that this post won't make a procrastinator's life any easier. Casual smartphone games are a great way to waste time, whether it is a couple of minutes or a couple of hours you have to spend. They require little to no dedication, they're easy to pick up and play, and many of them can be enjoyed for free. That's why many of the most popular games on mobile belong to this category. And below we have 7 casual Android games we think you should try. After you're done studying for that test, of course. They're all fun and they're all free, so there's nothing stopping you from giving them all a try. Which of these casual Android games you like best? Any great games we should have included? Let us know in the comments! Playing games while on the move can be tricky. You're dealing with the relatively small screen of a smartphone and short amounts of free time. Meanwhile many games focus on longer play sessions and small, detailed controls. For tablet play that's fine, but we're rounding up bite-sized, finger-friendly fun available on Android that's best suited for smartphones. Super Hexagon Super Hexagon is an action game where players dive through a maze of walls that are continually spinning and falling inwards. A constant, disorienting motion makes accomplishing this insanely difficult, and an amazing soundtrack doesn't help the nerves either. As you beat each stage, a harder version of the level is unlocked. Before long, things get well and truly ridiculous. Super Hexagon is the game of choice for gluttons of punishment. Download Super Hexagon (opens in new tab) (\$2.99) Dumb Ways to Die Players in Dumb Ways to Die have to survive a barrage of deadly mini-games which get harder as time goes on. These include swatting away deadly wasps, shooting piranhas away from your crotch, and holding onto balloons so you don't dive onto the tracks. Three adorable animated deaths and it's game over. As you progress, your collection of dancing cartoon corpses grows. All in all, Dumb Ways to Die is a fantastically morbid test of reflexes. Download Dumb Ways to Die (opens in new tab) (Free, ads) Despicable Me: Minion Rush Despicable Me: Minion Rush is an endless runner featuring the adorable little creatures from the popular animated film. Players have to swipe left and right to avoid incoming obstacles and collect bananas and power-ups. Camera angles and control types change regularly, demanding players stay on their toes, and with lots of unlockable content, including costumes and new running areas, the game stays fresh for a long time. Despicable Me: Minion Rush is hugely entertaining and a great way to kill a few minutes. Download Despicable Me: Minion Rush (opens in new tab) (Free, IAPs) Dots Dots is an easygoing puzzle title that involves lining up identically-colored dots as quickly as possible. Gather up dots by drawing a line through them, and get bonuses for creating closed loops. At the end of a round, either by time or number of moves, the gathered dots can be spent on power-ups to help in future matches. Pass-and-play multiplayer is also available, if you want to see how you stack up against your buddies. Dots is easy to pick up, and great to look at. Download Dots (opens in new tab) (Free, IAPs) Canabalt Canabalt is a fast and furious endless runner with a minimalist art style. All you have to do is tap the screen anywhere to jump gaps between the buildings you're running over. There are a lot of other one-touch endless runners on Android, but Canabalt excels for its high speed, fluid animation, and short play cycle. You won't find any in-app purchases, power-ups, or anything like that here; the only challenge is to make it farther than your last run before faceplanting into another skyscraper. Despite its age, Canabalt is a pure, pared-down runner. Download Canabalt (opens in new tab) (\$2.99) Fruit Ninja Fruit Ninja is a hugely popular action game. Players make quick swipes to slice fruit tossed in the air before it hits the ground, but be sure not to hit the bombs. Though it's an older game, the developer has been updating regularly with new content. There's a premium currency, starfruit, that players earn through gameplay which is used to buy these bomb deflectors, bonus fruit, and new blades. Fruit Ninja has weathered the test of time and remains accessible and fun. Fruit Ninja (opens in new tab) (\$0.99, IAPs) Flick Soccer For a casual futbol game, Flick Soccer is great. It presents a variety of kicking games where players have to race against the clock, hit targets, and otherwise score some goals. The swipe recognition is highly polished and results in some very natural-feeling arcs. Even after the kick has landed, you can alter the trajectory with a quick swipe. Download Flick Soccer (opens in new tab) (\$1.99) Tetris Blitz Tetris Blitz is a reimagining of the classic block-dropping puzzle. Random blocks spawn at the top of the screen, and you have to tap a location to drop them so a solid row of blocks is formed. That row disappears, and you get points; the more rows you take out at once, the more points you get. The catch is that you only have two minutes to score as many points as possible. They've also tossed in power-ups which help you along the way, and a Frenzy meter which fills up as you score points and ultimately initiates a massive spout of points bonuses. Tetris Blitz is a fun, fast twist on a classic. Download Tetris Blitz (opens in new tab) (Free, IAPs) Major Mayhem Major Mayhem is side-scrolling shooter with dirt-simple controls. Players tap on secret agents and ninjas as they pop out from behind cover to open fire. Save scientists from the evil clutches of the evil do-wells, earn coins, and unlock new weapons and outfits. Major Mayhem is a goofy, action-packed ride with lots of flavor. Download Major Mayhem (opens in new tab) (Free, IAPs) Beach Buggy Blitz Beach Buggy Blitz players drive along the beach for as long as possible. There are plenty of obstacles along the way that slow you down if you hit them, and if you can't make the next checkpoint before the clock runs out, it's back to the starting line. Coins are scattered along the route which fund upgrades like new rides and power-ups. Dust, water, and lighting effects are all hugely impressive, and add up to a surprisingly rich experience. Though Beach Buggy Blitz is kid-friendly, it's a ton of fun for everybody. Download Beach Buggy Blitz (opens in new tab) (Free, IAPs) Your favorite games for Android phones? Those are our favorite short-and-sweet Android games for phones, but what are yours? In a world once dominated by dedicated mobile gaming devices, smartphones have begun to take over, giving gamers a way to jump into other worlds when on the go. If you're using an Android smartphone to jump into your favorite titles, such as Fortnite, Call of Duty Mobile, or any of the best Android games, you should consider adjusting your settings to get the best experience. Here's how to optimize your Android smartphone for gaming. Adjusting system settings The best place to start when optimizing your Android smartphone for gaming is to dive into system settings. Your smartphone's settings app isn't just a place to change your device's wallpaper; you have control over how your device operates. Below we have listed a few Android system settings you should keep an eye on and how to adjust them for the best gaming experience. Use the fastest cellular network Your device's network mode dictates which cellular technology your device uses to connect to the internet. You may be gaming on a smartphone that supports 4G LTE or, even better, 5G — and in that case, you'll want to make sure the right technology is enabled to reduce latency or other connectivity issues. On most Android devices, you can follow these steps to select the fastest cellular network: Step 1: Open the Settings app. Step 2: Choose the Network & Internet option, then Mobile Network. Step 3: Tap Advanced, then Preferred Network Type. Step 4: Choose the Global option to allow your device to optimize its connection. If you own a Samsung Galaxy device, follow these steps: Step 1: Open the Settings app. Step 2: Choose the Connections option. Step 3: Select Mobile Networks. Step 4: Under Network Mode, pick the option highest up on the list. For 5G smartphones, this option will be 5G/LTE/3G/2G (auto connect). Enable Dolby Atmos for gaming If you have a Samsung Galaxy device, it may support Dolby Atmos, along with the more customized Dolby Atmos for Gaming. The Dolby Atmos setting applies an effect to your device's audio, attempting to create a more surround-sound and immersive experience. Here's how to enable Dolby Atmos on a Galaxy device: Step 1: Open the Settings app. Step 2: Select Sounds and Vibrations. Step 3: Choose Sound Quality and Effects. Step 4: Ensure that both Dolby Atmos and Dolby Atmos for Gaming are switched on. Enable high-refresh displays High refresh rates are quickly becoming a staple feature on Android smartphones. With a high refresh rate enabled, motion on-screen appears smoother as the screen updates its image faster than an average display. Not all games take advantage of fast refresh displays, but this trick will ensure you get the best possible response for those that do. You can find this setting on some Android smartphones by opening the Settings app and searching for either Refresh Rate or Motion Smoothness. Here's how to adjust the setting on supported Galaxy devices: Step 1: Open the Settings app. Step 2: Select the Display option. Step 3: Choose Motion Smoothness. Step 4: Select the High option and click Apply. Manage your background applications No matter how well you optimize your device for gaming, it won't matter if you have a collection of apps running in the background. Your Android device has a limited number of resources that it can dedicate to its operation, and if you have applications running in the background, they will prevent your game from taking full advantage of your hardware. Be sure to quit any background applications before launching your game. For more information, check out our dedicated guide on controlling background applications. Use dedicated gaming apps Another option for squeezing out the best performance level from your Android smartphone is to use a dedicated game-boosting application. A number of smartphones now come with a booster mode, including OnePlus and Samsung phones, but if you don't have one, you can download a third-party app. Our favorite is Game Booster by BGMobile; this free app has ad support, but a paid version without ads is also available. After installing Game Booster, the app will automatically free up resources whenever you start a game. It can also display your frames per second (FPS) on screen, as well as an on-screen crosshair for first-person shooters. Download Game Booster: If you own a Samsung Galaxy device, you can use the built-in Game Plugins app to boost your games when playing. Simply launch the Game Plugins app and ensure that Game Booster Plus is enabled. You can even further customize your experience by choosing a preferred optimization for each game on your device, including Battery Saving, Balance, Max FPS, and High Quality. Andy Boxall/Digital Trends Purchase a gaming smartphone Let's begin this suggestion with a bit of contradiction — you don't need a gaming smartphone to play video games. Some manufacturers, such as ASUS with the ROG Phone 3 and Razer with the cleverly named Razer Phone 2, offer smartphones that promise increased performance when gaming. While the performance found on these smartphones is indeed excellent for gaming, they aren't required for a great experience. If you are interested, be sure to check out our buying guide on gaming smartphones for our latest top picks. Editors' Recommendations
